# what is tubesac ?

---

TubeSac is a long tube of 3 layer co-extruded PE where you yourself decide the size of the bag by using a cable tie or knot.

Simply fill TubeSac until you think it is full. This means that the bag is always the right size for your needs, and you avoid paying for unused material, which in turn leads to lower waste and handling costs.

TubeSac is delivered as a cassette that you can easily apply to a stand and is ready for use straight away.

Highly versatile, TubeSac has many areas of use including health care, food waste and production waste.

TubeSac is ideal in environments that demand good hygiene – when handling TubeSac, you never need to touch the waste or areas that the waste may have come into contact with because it “attaches to” the next sack. By sealing the bags with cable ties, you also avoid unpleasant odours since the tie forms a completely tight seal around the bag opening.

Easy - Flexible · Minimal Waste  
Optimal Waste Management

## Hygienic

- No contact with the waste.
- Spills around the edges go into the next bag.
- The simple stand is easy to wash and keep clean.

## Cost-effective

- Use less and save more.
- Use only as much as you need.

## Adaptable

- Height-adjustable stand fits nicely under benches, desks, etc.
- Tilttable crane makes it easy to throw waste away.
- Wheels make them easy to move.

## Time-saving

- Close, empty and put in a new bag in just 15-25 seconds.
- An “endless” bag that’s always ready to go.
- No need to waste time looking for a new roll.

## Ergonomic

- Change-out takes place from the side and not from the top, reducing workload injuries.
- You choose how heavy you want the bag to be.

## Environmentally friendly

- Prevents excess waste.
- Save on PE by not using more than necessary.

Here's how **tubesac** reduces the time spent on your bag replacements to **15-20 seconds**

1 Lift the bag to the side  
3-5 seconds

2 Gather the bag  
4-5 seconds

3 Apply two cable ties  
4-5 seconds

4 Cut in between the ties  
4-5 seconds

5 Ready to use !

# TubeStand

TubeStand is our own developed stand which suits the TubeSac perfectly.

TubeStand comes in two different versions, one in stainless steel the other in powder coated metal. This makes our stands extremely durable and tough.

The stand is available in two sizes and two versions, one large and one small to be placed either on the floor or as a wall-mounted model.

**All stands are delivered fully equipped with a pair of scissors.**

**Art.no** : TSPL1  
**Material** : Powder-coated metal

 Wall mounted model

# TubeSac DUSTY

A customisable sack system, now available for dust extractors and hoovers.

Made of extra strong, 3-layer co-extruded material to prevent damage from high-speed particles and other punctures and tear damage that can occur in an industrial environment.

Just like our other products in the TubeSac range, you can change out the bag without worrying about touching the contents or having them spill out of the bag. This means your workplace is always kept clean and tidy. And because you can change out the bags in just a few seconds, you don't need to interrupt your other operations.

Each carton contains cable ties to seal the bags.

Diameter : 357mm

Length : 22m

**Extra Thick !**  
**4 cassettes/pack**

## TubeSac SUPER

Super is our more robust series of TubeSac products that offers a flexible, easy-to-use waste management system where you never use more bag than you need. This way, you save money and the environment at the same time.

In environments requiring good hygiene and tidiness, it makes the perfect choice since you never need to come into contact with the waste. Plus, you can change the bags in a matter of seconds.

# TubeStand “Large”

TubeStand is our very-own stand specially designed for TubeSac, and comes in several models and materials for nearly any use.

Our stands are made in Sweden either of powder-coated metal or stainless steel, which makes them incredibly strong and stable.

**Art.no** : TSL1

**Material** : PE-HD

Removable lid for TubeStand “Large”

**Art.no** : TSPL1

**Material** : Powder-coated metal

**Diameter** : 420mm

**Height adjustable** : 76-100cm

**Art.no** : TSRF1

**Material** : Stainless steel

**Diameter** : 420mm

**Height adjustable** : 76-100cm

# TubeStand “Small”

Our smaller stands never skimp on big benefits. You get the same fine quality and hygienic materials, but in even more varieties for direct wall mounting.

Our stainless steel models are excellent in food production, while the coated variety withstands industry's tough usage.

**Art.no** : TSPL4  
**Material** : Powder-coated metal  
**Diameter** : 290mm

**Height adjustable** : 60-85cm

**Art.no** : TSL2  
**Material** : PE-HD  
Removable lid for TubeStand “Small”

## TubeSac “Small”

This is our smaller version of TubeSac and is nearly even more adaptable and flexible than its companion, the TubeSac “Large”, thanks to its compact size.

It has the same unique features and might just be our customers' future favourite!

# TubeSac Biostark

A customisable sack system, Biostark TubeSac is not only flexible but is 100% biodegradable and 100% climate smart. It's also a shining example of our commitment to finding sustainable, climate-friendly solutions.

Biostark TubeSac is made of 100% biodegradable material. This material bears the "OK Compost" logo, which means that it has been certified to comply with the **European standard EN 13432**.

Biostark TubeSac is made from PLA (polylactic acid), which is derived from renewable resources like corn starch or sugar beet.

TSBIO40 comes with 60 tie clips that you can use to seal the bag closed when you decide that it's full.

# About us

---

We have been working with polyethylene since the beginning of 2000.

Our company has seen a steady growth, year by year and during this time we have developed knowledge about PE-products that few competitors can match. Our broad range is available in a lot of different qualities and can be adapted totally for your requirements or needs.

With our own production we shorten leadtimes and keep the costs down by eliminating the "middle man" and with our own warehouses in Stockholm and Ljungby we can effectively distribute our products nationally and internationally.

**Mission:** To be a rational manufacturer and an overall supplier of customer specific and branded polyethene bags and foils to wholesalers and chains.

**Vision:** Through continuous investments in an effective production we will become Scandinavias and Europe's most sustainable source of polyethene products. To be the PE-markets "House of Brands" - The widest overall supplier of branded bags and foils.

Our **Values:**

- Positive
- Creative
- Cost-effective
- Flexible

**NPA Team**

“ A constant striving to always make things better, simpler and more efficient. ”

# Our Team

NPA has a strong commitment to their customers. We are a certified ISO 9001 & ISO 14001 Company, who have willing staff to care for your needs. We would be glad to help you in any way we can.
